Description of Printmaking

This is an entry-level course for the High School Visual Arts Core Curriculum. Printmaking teaches how to make fine art prints using studio processes such as relief, intaglio, planography, and stencil. With an emphasis on studio production, this course is designed to develop higher-level thinking, art-related technology skill, art criticism, art history, and aesthetics. *The prerequisite for this course is Foundations I or II.*

Explanation of Standards

There are two basic goals in a visual arts education: one, creating meaning in works of art, and two, perceiving meaning in works of art. The Utah State Visual Arts Core divides each of these goals into two standards. The resulting four art standards are Making, Perceiving, Expressing, and Contextualizing. These four divisions or standards organize the curriculum into manageable and related units and guide the student toward a deep and holistic comprehension of the Visual Arts. Each standard is broken into objectives, each objective into indicators. A scoring box is placed to the left of each objective. The student scores his or her achievement within each objective using a number ranging from 0 to 10. A legend is provided wherein the student and teacher tally both the average score from the objective boxes and the total number of indicators the class has studied.

Technology requirements for this class include computers with art/graphics software, color printer, image projectors, and appropriate new technologies.

Listed below are all of the courses presented in the Visual Arts Core Curriculum. There are additional, elective courses such as AP Art History and Studio Art available in many schools.
